ELECTRICAL INSTALLATION CONDITION REPORT

-		
PART 1: DETAILS OF THE CONTRACTOR, CLIENT AND	INSTALLATION	
DETAILS OF THE CONTRACTOR Registration No: 010706000 Branch No*: 000 Trading Title: Smail & Richards Electrical Contractors Ltd Address: Top Floor C Store, Halcyon House, West Hill, St. Helier, Jersey Postcode: JE2 3HB Tel No: 01534 723503	DETAILS OF THE CLIENT Contractor Reference Number (CRN): 174294 Name: Brunel Management Limited AddressBrunel Chambers, Devonshire Place, St. Helier, JERSEY Postcode: JE2 3RD Tel No: 01534750200	DETAILS OF THE INSTALLATION Occupier: N/A UPRN: N/A Address: Flat 10 Berkshire Court, La Motte Street, St. Helier, JERSEY Postcode: JE2 3BE Tel No: N/A
PART 2 : PURPOSE OF THE REPORT		
Purpose for which this report is required: Clients request and to meet the Jersey landlords legislation Date(s) when inspection and testing was carried out: (24/10/2023)	Records available (651.1): () Previous inspection report avail	able (651.1): (
PART 3: SUMMARY OF THE CONDITION OF THE INST	ALLATION	
General condition of the installation (in terms of electrical safety):The general condition of the installation (in terms of electrical safety):The general condition of premises Dwelling: (strial: (N/A) Other (include brief description): N/A ons: (NA if Yes, estimated age N/A years) Overall assessment of the installation	n for continued use: Satisfactory/Wh&&thatanoony ** (delete as appropriate)
PART 4: DECLARATION		
INSPECTION AND TESTING I/We, being the person responsible for the inspection and testing of the electrical installation (declare that the information in this report, including the observations (PART 5) and the attache Name (capitals) on behalf of the contractor identified in PART 1:JOSH LE MARQUAN I/We further RECOMMEND, subject to the necessary remedial action being taken, that the inst Give reason for recommendation:All rented Property should be inspected every 5 y. The proposed date for the next inspection should take into consideration any legislative or licensing require. REVIEWED BY THE REGISTERED QUALIFIED SUPERVISOR FOR THE CONT	d Schedules, provides an accurate assessment of the condition of the electrical installation to ID Signature: Signature: (date) allation is inspected and tested by: 24/10/2028 (date) rears, or change of tenancies ments and the frequency and quality of maintenance that the installation can reasonably be expected to recommend to the frequency and quality of maintenance that the installation can reasonably be expected to recommend to the frequency and quality of maintenance that the installation can reasonably be expected to recommend to the frequency and quality of maintenance that the installation can reasonably be expected to recommend to the frequency and quality of maintenance that the installation can reasonably be expected to recommend to the frequency and quality of maintenance that the installation can reasonably be expected to recommend to the frequency and quality of maintenance that the installation can reasonably be expected to recommend to the frequency and quality of maintenance that the installation can reasonably be expected to recommend to the frequency and quality of maintenance that the installation can reasonably be expected to recommend the frequency and quality of maintenance that the installation can reasonably be expected to recommend the frequency and quality of maintenance that the installation can reasonably be expected to recommend the frequency and quality of maintenance that the installation can reasonably be expected to recommend the frequency and quality of maintenance that the installation can reasonably be expected to recommend the frequency and quality of maintenance that the installation can reasonably be expected to the frequency and quality of maintenance that the installation can reasonably be expected to the frequency and quality of maintenance that the installation can reasonably be expected to the frequency and the frequency a	Date: 24/10/2023 Date: 24/10/2023 Ceive during its intended life. The period should be agreed between relevant parties.
Name (capitals) on behalf of the contractor identified in PART 1: JAMES NORTON	Signature:	Date: 26/10/2023

ELECTRICAL INSTALLATION CONDITION REPORT

Issued in accordance with BS 7671: 2018+A2:2022 - Requirements for Electrical Installations

PART 6: DETAILS AND LIMITATIONS OF THE INSPECTION AND TESTING														
The inspection and testing has been carried out in accordance with BS 7671: 2018, as amended to														
(see additional page No.N/A) Agreed limitations including the reasons, if any, on the inspection and testing (653.2): Any concealed cables installed in prescribed zones or above ceiling was not inspected, any joint boxes under the floors or above the ceiling were not inspected														
Agreed with (print name): S FARRAF @ BRUNEL														
Extent of sampling: 30% of sockets, light fitting and switch were removed and inspected (see additional page No.N/A)														
Operational limitations including the reasons: For some circuits R1+RN-R2 used when testing insulation res	sistance. Not able to access all points due to furniture (see additional page No.N/A)													
PART 7 : SUPPLY CHARACTERISTICS AND EARTHING ARRANGEMENTS														
System type and earthing arrangements TN-C: (N/A) TN-S: (N/A) TN-S: (N/A) TN-C-S: () AC 1-phase, 2-wire: (N/A) 3-phase, 3-wire: (N/A) Nominal voltage between lines, U[1]: (N/A) Nominal line voltage to Earth, U_0[1]: (N/A) Nominal line volta														
PART 8 : PARTICULARS OF INSTALLATION REFERRED TO IN THIS REPORT	r													
(delete as appropriate) Means of Earthing Earthing conductor: Water installation Distributor's facility: (✓.) Installation earth electrode(s): (N/A) Earth electrode type - rod(s), tape, etc: (None) (None) (material Copper) Location: (N/A) (N/A) Earthing conductor: (material Copper) (material Copper) Other (state): (material Copper) Other (state): (material Copper) Other (state): (N/A) N/A	n pipes: (N/A) BS EN: (60947-3) Type: (3) Rating / setting of device: (100) A													

All fields must be completed. Enter either, as appropriate: '\(\sigma' \) if Acceptable condition; 'N/A' if Not applicable; 'LIM' if a Limitation exists, or Code appropriately: CODE 'CI,' 'C2,' 'C3' or 'FI' (codes to be recorded in PART 5, with additional comments (where appropriate) on attached numbered sheets)

^{*}Where the installation is supplied by more than one source, the higher or highest values of prospective fault current, I_{pf} , and external earth fault loop impedance, Z_{e} , must be recorded.
