

DOMESTIC ELECTRICAL INSTALLATION CONDITION REPORT

Requirements For Electrical Installations - BS 7671 IET Wiring Regulations

						Report	Report Reference:			LCG, 03		
1 DETAIL	LS OF THE	E PERSON	ORDE	RING TH	E REF	PORT						
Client:	Brunel management											
Address:	Brunel Chambers Devonshire place St Helier Jersey											
2 REASON FOR PRODUCING THIS REPORT Reason for producing this report:												
Safety assessment requested by client.												
Date(s) on w	hich inspect	tion and test	ting was	carried out	t:	20/01/2020						
3 DETAIL	LS OF THE	E INSTALL	ATION	WHICH	S THE	SUBJECT OF T	HIS R	POR				
Installation	Address:	No 03, Le	Grand	clos, St H	lelier,	JE2 3BB						
Estimated ag	e of wiring	system:	14	years		Evidence of additional terations:	ons/	No	if yes, estimated	age:	years	
Installation re	ecords availa	able? (Regu	ılation 65	51.1)	N/A		Dat	e of las	t inspection:	26/1	10/2006	
						ID TESTING						
Extent of the electrical installation covered by this report: 100% of the installation.												
Agreed limitations including the reasons (see Regulation 653.2):												
Inspection where access is freely given. Limitation of inspection of cables installed behind ceilings and walls. No furniture is to be moved by engineers. Insulation resistance on circuits will only when we can guarantee no item on the												
circuit can I	be damage	ed. Bath pa	anels are	e not to be	e remo	oved for inspection	n.					
Agreed with:												
Operational li	imitations in	cluding the	reasons:									
The inequation	n and taatin	aa datailad i	n thia ram	and and a			wa baar	. corric	d out in accordan	oo with D	C 7671:2016	
(IET Wiring R	Regulations)	as amende	d to 2018	8.		inying schedules ha						
It should be noted that cables concealed within trunking and conduits, under floors, in roof spaces, and generally within the fabric of the building or underground, have not been inspected unless specifically agreed between the client and inspector prior to the inspection.												

An inspection should be made within an accessible roof space housing other electrical equipment.

SUMMARY OF THE CONDITION OF THE INSTALLATION

See page 3 for a summary of the general condition of the installation in terms of electrical safety.

Overall assessment of the installation in terms of it's suitability for continued use*:

SATISFACTORY

* An unsatisfactory assessment indicates that dangerous (Code C1) and/or potentially dangerous (Code C2) conditions have been identified.

RECOMMENDATIONS

Where the overall assessment of the suitability of the installation for continued use on page 1 is stated as 'UNSATISFACTORY', I/We recommend that any observations classified as 'Code 1 - Danger Present' or 'Code 2 - Potentially dangerous' are acted upon as a matter of urgency.

Investigation without delay is recommended for observations identified as 'FI - Further Investigation Required'.

Observations classified as 'Code 3 - Improvement recommended' should be given due consideration.

Subject to the necessary remedial action being taken, I/we recommend that the installation is further inspected and tested by:

5 Years or change of tenant/owner

Note: The proposed date for the next inspection should take into consideration the frequency and quality of maintenance that the installation can reasonably be expected to receive during its intended life. The period should be agreed between relevant parties.
