EXTENT AND LIMITATIONS OF INSPECTION AND TESTING Extent of the electrical installation covered by this report:								
100% of the installation.								
Agreed limitations including the reasons (see Regulation 653.2):								
No Lifting of floor boards or inspection of loft space.								
Agreed with:								
Operational limitations including the reasons:								
The inspectio	n and tasting datailed in	this rong	art and accompa	wing schodulos have t	oon carried ou	it in accordance i	with BS 767	1.2018
The inspection and testing detailed in this report and accompanying schedules have been carried out in accordance with BS 7671:2018 (IET Wiring Regulations) as amended to 2018.								
It should be noted that cables concealed within trunking and conduits, under floors, in roof spaces, and generally within the fabric of the building or underground, have not been inspected unless specifically agreed between the client and inspector prior to the inspection.								
An inspection should be made within an accessible roof space housing other electrical equipment.								
5 SUMMARY OF THE CONDITION OF THE INSTALLATION								
See page 3	for a summary of the ge	eneral co	ondition of the ins	tallation in terms of ele	ctrical safety.			
Overall asse continued us	ssment of the installat	tion in te	rms of it's suita	bility for		SATISFACTO	RY	
	factory assessment in	dicates t	hat dangerous (	(Code C1) and/or pote	entially dange	rous (Code C2) (	conditions I	have
been identifi								
	IMENDATIONS		114 <b></b>	tion for an time days				, 100/-
Where the overall assessment of the suitability of the installation for continued use on page 1 is stated as 'UNSATISFACTORY', I/We recommend that any observations classified as 'Code 1 - Danger Present' or 'Code 2 - Potentially dangerous' are acted upon as a								
matter of urgency. Investigation without delay is recommended for observations identified as 'FI - Further Investigation Required'.								
Observations classified as 'Code 3 - Improvement recommended' should be given due consideration.								
Subject to the necessary remedial action being taken, I/we recommend the installation is further inspected and tested by:					5 Years	or change of te	nant/owne	r
Note: The proposed date for the next inspection should take into consideration the frequency and quality of maintenance that the								
installation can reasonably be expected to receive during its intended life. The period should be agreed between relevant parties.
